The boat will set sail from the port of Carboneras, heading first to the **Playa de los Muertos** (Beach of the Dead), with the bluest, most crystalline water in the area.

We will sail inside the Marine Reserve of the Natural Park, spotting from there the Lighthouse of Mesa Roldan, and different coves such as **Cala Castillo, Cala Sorbas, Cala Arena or Cala Media Naranja**. We will discover from the sea the remains of the Aguamarga Mineral Loading Dock, the natural signs caused by erosion in the rock that guide the fishermen and during the boat excursion we will enjoy the meadows of Posidonia oceanica (Neptune grass) and the seabeds, thanks to our submarine view. Whenever the weather permits, and the crew authorizes it, we will enjoy a swim in this privileged environment.

\*All departures and stops for swimming may be changed or suspended due to weather conditions or following instructions from the boat captain.
